

Motor Alternator (MA) Set

Manufactured to Norsok 2.7.1 Specification

Ideal for use on vessels to power equipment requiring a clean power supply

Do you have a requirement for a clean power source to power your onboard spreads such as ROV's, Pipelay Spreads, Reel Drive and other back deck equipment?

If the answer is yes a OOS manufactured MA set is the cost effective answer to your clean power requirements.

Specification:

- Norsok Specification 2.7.1
- 400-460V 50amp
- Panel consists of energy meters – input/output supplies
- By-pass switch in case of failure of either motor or alternator
- Line insulation monitoring on output supply
- Voltage, current, frequency & hour run metering
- All at a touch of a button

The unit weights 1250kg and comes complete with all DNV documentation and lifting certifications.
